The Clare Fire Department has recently been designated a Public Protection Class rating of 4/9. This is a change from the prior rating of 6. The PPC is determined by the Insurance Services Office (ISO). ISO collects and evaluates information from communities in the US on their structure fire suppression capabilities. After analyzing the information the Fire Department is assigned a Public Protection Class rating.

CFD has been at a Class 6 for the past 10 years. The process of this change is ongoing and has been developing over the past several years. Some of the factors include improvements in the Clare city water system, advanced fire department equipment and training, response times as well as other factors.

Clare Fire Department Chief James Chapman said “the improvements in the Fire Department Public Protection Class rating is great news, not only for our department, but for the city of Clare and surrounding townships. Most of the improvements were completed prior to my appointment as chief. I would like to acknowledge all the fire department members who have been diligently working to get to this place”.

The lower protection class rating may result in lower insurance premiums for homeowners and more likely for commercial buildings. A bit of good news in this challenged economy! 😊
